ISTA-320, Cohort 3

C# Step by Step, Chapter 26

December 3, 2017

1. Describe the three concerns that the *Model-View-ViewModel* design pattern addresses.

2. Describe in detail how the MVVM design pattern works.

3. Describe in detail how *data binding* works with respect to controls and models.

4. Describe the three methods that the *ICommand* interface defines. What is the purpose of each method?

5. What is a *data context*? Why do we need a data context? What does it do?
